

HAVE AMPLE PROTECTION FOR ALL FAIR VISITORS

Uniformed Police and Plain-Clothes Men Are on Constant Duty at Show Grounds.

FIRE APPARATUS INSTALLED

Emergency Hospital Equipped to Render First-Aid Treatment—Boy Scouts Also on Hand to Give Assistance When Needed.

Ample precautions have been taken to afford the Fair Grounds proper fire and police protection. In addition to the county policemen under Deputy Sheriff Snyder, Sergeant Martin, of the Second District, is in charge of a city police detail, and has headquarters under the west end of the grand stand, where also is a temporary police station. Sergeant Jack Sheppard is in charge of the station, and the detail reports to him upon arrival and going of duty as at the regular stations. Sixteen men are detailed in the morning, nineteen men in the afternoon, and at night there are twenty-five men on duty. In addition, all other policemen visiting the grounds while off duty are required to appear in uniform, and are always subject to call, so that at times there are fifty men in uniform scattered through the grounds. Detectives from headquarters are also assigned to duty at the fair. The automobile patrol of the First District is kept in constant use at the grounds, and prisoners are brought to the city stations for safekeeping.

The private policing of the grounds is in the hands of the Pinkerton National Detective Agency. Twenty-two men from this agency are employed at the gates and inside the grounds, and all are under the management and direction of Captain A. G. Smith, who is being assisted by Sergeant Lynch, of Philadelphia.

FIRE APPARATUS IS INSTALLED ON GROUNDS

Captain Cosby, of Engine Company No. 12, is in charge of a detail of firemen and a chemical wagon and other fire apparatus installed on the grounds. The men are comfortably quartered, and live and have their meals on the grounds. A fire alarm system has been installed by Captain William S. Thompson, inspector of the city fire and police telegraph systems, so that an alarm can be sent in immediately from any point.

Other safety and protective measures include the city ambulance, and a detail of Boy Scouts. An emergency hospital has been installed, and is fully equipped with everything necessary for first-aid treatment. Dr. William S. Thompson, inspector of the city fire and police telegraph systems, so that an alarm can be sent in immediately from any point.

Nothing that can procure the safety of the visitors has been left undone, and the general scheme for prevention and protection is as complete as the directors could make it. Rest houses have been reared at many convenient points. Benches and park settees are scattered about Industrial Hall and around the exhibit buildings, and there are comfort booths under the care of charity and fraternal organizations. The Times-Dispatch invites all visitors to its booth, situated near the concessions office.

Boys' Corn Clubs

In size and quality the Boys' Corn Club exhibit is most gratifying to the officers of the State Fair Association. Files of the best corn Virginia soil can produce have been brought in by the young farmers from every section of the State, and the handsome exhibit is attracting widespread attention and much favorable comment. The rivalry between the boys in growing the grain has been keen. Many of the youth-fur contestants have entered their individual exhibits with the exhibit of their county, and by this method of greater interest in the display has been aroused. The Boys' Corn Club movement, which has literally swept the State, is endorsed by every thinking man, for the State fair is a day to-day will be Virginia's most progressive agricultural fair to-morrow.

Many of the youths who have brought exhibits to the State Fair are enjoying to the fullest extent the other exhibits and varied attractions at the grounds. Having exhibits themselves, they are interested in other displays of farm products, and deriving great benefits from their visit to the fair.

Tractor Engine Exhibit

Acres of space have been taken by exhibitors of farming implements and high-power machinery. Local dealers have taken large concessions, while out-of-town concerns are far in excess of previous years.

To a layman the implement and machinery reservation of one mass of green and red wagons, reapers, huskers, shuckers and all other varieties of time-saving devices for the farmer. The thing that impresses the eye is the whirling belts, the revolving wheels and the put-put of the engine exhausts.

One of the new exhibits which is attracting considerable attention is that of the Bull Tractor Company. The big engine is a plowing machine which does the work of at least five mules, up hill or down hill. P. H. Knoll, secretary of the company, who is in charge of the exhibit, says the machine has been greatly in demand in the West and Northwest, and the factory was recently enlarged to meet the new avenues of trade.

Mr. Knoll selected Richmond as the site of the exhibit, in which to exhibit his machine. The exhibit is just in the rear of the Farm Demonstration Building, and is an interesting one to visit.

Among the local exhibitors who have their usual large and complete displays are the Snyder Pump and Well Company, Hoeniger and Sizemore, Watt Plow Company, Implement Company, the Exhibits Company and others.

The exhibits are all arranged on the usual plot of ground near the Industrial Building, and demonstrations are given whenever a customer wishes to see the wheels go round.

In the Industrial Building

Fair visitors can spend a day in the Industrial Building to excellent advantage, for here are grouped the offerings of the local and foreign manufacturers, as well as a large number of educational features well worth viewing. The big building, while not completely ready today, will be ready to-day, with every reservation taken, and not an inch of space going to waste.

The building, with many of the booths completely ready, was a veritable power of beauty. Space has been vied with each other in putting forth artistic exhibits, and no expense has been spared to make the most attractive booth in the building.

And the fair people have done their

AHEAD OF THE PROCESSION

At your service, uncle, before anyone else.

share in the way of decorations. Flags and bunting cover the ceilings and hide the beams from the view of the throngs in the floor. It is a riot of color, with the national emblem displayed in every conceivable cluster and festoon the fancy of the decorator could devise.

The outside of the building has not been neglected, and from hundreds of tiny masts there float pennants and flags, which rival the rainbow in colors. Everything points to the holiday spirit, and one glimpse of the big brick structure docked out in the gay colors tells the sightseer that he has struck the right place at last.

There has never been a more complete and diversified exhibition than that housed under the big roof of the Industrial Building. The Woman's Department, the school exhibits, the railroad exhibits, the State Agricultural Department exhibit, the Health Department exhibits, the better babies' contest, and the innumerable exhibitions of manufacturing concerns, are only a few of the things to be seen.

During the day there are concerts in the building by the Killies Band, and singing by the artists, who perform before the grand stand. These concerts are arranged at times when the other free attractions are not in operation, and were highly enjoyed yesterday.

M'ALLISTER IS BAILED

Bond Furnished by Father of Girl He Is Accused of Marrying.

L. A. McAllister, the man brought back to Richmond from Charlottesville on a nonsupport charge, and against whom a warrant was issued, charging him with bigamy, was released from custody on a \$500 bond furnished by M. G. Graves, father of the seventeen-year-old girl whom he is alleged to have married in Crozet while still the legal husband of a Richmond woman. McAllister was held for his appearance in Police Court on October 22, when the preliminary hearing of the case will take place.

McAllister, according to the information gathered by the police, married the widow of James Marcellus Mullin, of Chase City, on December 2, 1902. He has been summoned to Police Court to answer desertion and nonsupport charges. Detective Sergeant Atkinson, who brought him back here from Charlottesville on Sunday, learned of the girl wife in Albemarle, and swore out another warrant, charging him with being a suspicious character suspected of bigamy.

McGill Union Elects Officers. Gratifying reports on the work done during the past year were submitted by officers of the McGill Catholic Union at a meeting held last night in the rooms at 810 East Grace Street. The following officers were elected to serve during the ensuing year: president, John W. Nokes; vice-president, James M. Purcell; secretary, William F. Wright; treasurer, Thomas L. Cox. Joseph A. Dart was elected to the board of governors.

Two Inquests to Be Held. Coroner Taylor yesterday ordered an inquest into the death of six-year-old Goldie Inge, who died Friday from injuries received when she was struck

by a street car on East Broad Street. The inquest will be held Thursday afternoon. Goldie Inge was the daughter of Mrs. Daisy Inge, of Winston-Salem, N. C. She was injured on August 31.

An Inquest into the death of Mary

Strong, colored, who is said to have been shot to death by her husband Saturday night, will be conducted this afternoon by Coroner Taylor. The husband, for whom a warrant has been issued, has not been located by the police.

Resinol Soap

clears pimply skins

Bathe your face for several minutes with Resinol Soap and hot water, working the creamy lather into the skin gently with the finger-tips. Wash off with Resinol Soap and more hot water. Finish with a dash of cold water to close the pores. Do this once or twice a day, and you will be astonished to find how quickly the healing, antiseptic Resinol medication soothes and cleanses the pores, removes pimples, and blackheads, and leaves the complexion clear, fresh and velvety.

An Interesting Showing of STIEFF SILVER

You are invited to call to-day, Wednesday, Thursday or Friday, October 6th to 9th, inclusive, and inspect the beautiful showing of Sterling Silverware, both handwrought and plain, produced by the famous Stieff silversmiths at the Stieff factory at Baltimore, now on view in Richmond at

The Jefferson

Don't fail to call and examine the exquisite designs produced by the Stieff silversmiths. This representative and interesting selection of pieces from the factory at Baltimore merits your attention.

Don't miss this interesting display.

DAIRY CAR SPENDS DAY AT WEST POINT

Demonstrations and Lectures Accompanied by Actual Testing of Milk Samples.

The Southern Railway's special "dairy instruction car," which is now making a tour of Virginia for the purpose of encouraging Virginia farmers to take up dairying and supply the large home demand for dairy products, spent yesterday in West Point, and a large crowd of local farmers and dairymen was in attendance. Demonstrations and lectures were conducted throughout the day by expert lecturers accompanying the car, and milk samples were tested, and advice given on questions of interest to local farmers. The tour of the car is arousing the greatest interest among dairymen and farmers, and large crowds have been in attendance at every point visited. Following is the remainder of the itinerary for Virginia:

Tuesday, October 6, Chase City; Wednesday, October 7, Clarksville; Thursday, October 8, Milton; Friday, October 9, Jeffers; Saturday, October 10, Boynton; Monday, October 12, South Hill; Tuesday, October 13, Lawrenceville; Wednesday, October 14, Emporia; Thursday, October 15, Claremont; Friday, October 16, Waverly; Saturday, October 17, Capron; Monday, October 19, Courtland; Tuesday, October 20, Franklin; Wednesday, October 21, Holland; Thursday, October 22, Stafton. An entire day will be devoted to each stop, with lectures and demonstrations morning and afternoon.

Governor to Attend Orange Fair. Because he is scheduled to deliver an address to the American Bankers' Association on October 14, Governor Stuart yesterday advised the directors of the Orange County Fair that his visit to the following day, October 15. The confusion of dates was due to the mul-

A Hint for Coming Maternity

In a little book designed for expectant mothers more complete instruction is given in the use of "Mother's Friend." This is an external embrocation applied to the abdominal muscles for the purpose of reducing the strain on ligaments, cords and tendons.

It serves to ease the mind, indirectly has a most beneficial effect upon the nervous system and thousands of women have delightedly told how they were free of nausea, had no morning sickness and went through the ordeal with most remarkable success. "Mother's Friend" has been growing in popular favor for more than forty years. In almost every community are grandmothers who used it themselves, their daughters have used it and they certainly must know what a blessing it is when they recommend it so warmly. It is used very successfully to prevent caking of breasts.

"Mother's Friend" has been prepared in the laboratory of Bradford Regulator Co., 304 Lamar Bldg., Atlanta, Ga., for more than two generations and can be had of almost any druggist from coast to coast. Write to-day for the little book.

tiplicity of official and semi-official engagements to which the Governor is committed during the month of October. Preparations for the reception and entertainment of the executive will suffer no interruption, the many days notice in advance enabling the Orange County Fair directors to rearrange the program conveniently.

Declines Farmville Call.

Rev. Thomas G. Faulkner, assistant rector of Holy Trinity Episcopal Church, of Richmond, recently declined a call to the rectorship of St. John's Memorial Church, of Farmville, Va. Mr. Faulkner, who is a native of Boynton, Va., is well known through the State. He came to Richmond last spring from Greensboro, N. C. It was stated last night that as yet no one has been secured as rector of the Farmville church from which the Richmond minister received a call.

Church Hearing Continued.

Judge R. Carter Scott in the City Circuit Court yesterday continued the hearing in the matter of the sale of immanuel Baptist Church to a colored congregation until next Monday at noon.

Reports Auto Stolen.

A Ford touring car, belong to J. D. Carnell, of 2331 Monument Avenue, was stolen from in front of his residence early last night, according to a report made to the police. Efforts to locate the machine were unsuccessful up to an early hour this morning.

They Saved \$75

A fire insurance agency needed a counter and a couple of filing cabinets.

They had about decided to have the counter made by a local carpenter, at a cost of \$175, when a Library Bureau salesman dropped in. He showed them that for \$150 they could buy a counter composed of L. B. filing cabinets, cupboards, etc., as shown above.

He got the order. The insurance men got a better counter and got it right away.

Result: \$75 in money saved (\$25 on the counter and \$50 for the filing cabinets which they did not have to buy), besides considerable floor space. And if the insurance men move, they can take the counter-high units with them.

Do YOU need a counter?

THE SENSATION OF THE FAIR

FIELD CONTEST IN KANSAS.

The BULL Plowed 50% More and One Inch Deeper.

A tractor that pulls the load of five mules continuously and develops twelve horsepower on the belt for all kinds of stationary work for..... **\$395**

A DEFENDABLE SMALL TRACTOR AT A PRICE THAT MAKES HORSES TOO EXPENSIVE TO KEEP.

You—farmers working 80 acres or more—have felt that a new mechanical power should be invented that will actually take the place of horses in the field and other farm work, and cost less to buy. After fourteen years' work, we are able conscientiously to offer this wonderful little tractor, which will fully satisfy your hopes.

What the Bull Tractor Is.

A three-wheeled machine; two in a hard, smooth furrow, and one on the stubble. One of the furrow wheels guides the machine when plowing, relieving the engineer of that responsibility.

Has a leveling device by which operator can readily level tractor when on side hills. Has but five working gears. One of these is a roller pinion. Has but one drive wheel, thus eliminating equalizing gears. Has but one main drive gear, which will last during the life of the tractor. The motor is two-cylinder, four-cycle, water-cooled type, and no better motor on the market to-day.

What the Bull Tractor Does.

Pulls two 14-inch stubble plows in any ordinary soil. Pulls the load of five horses. Travels somewhat faster than horses, and continuously. Never gets tired. Costs nothing for harness. Costs one-half as much for gasoline as for horse feed, and does not eat when it does not work. Gets your work done in time. It is no longer a question of expense only in doing your farm work, but it is a question of getting it done. Pulls Plows, Seeders, Harvesters, Mowers, Drills, Discs, and then grinds feed, saws wood, or does any stationary belt work on the farm.

No New Equipment Necessary.

One of the excellent features of this machine is that you do not have to buy expensive new equipment. With an attachment you can connect any gang plow or farm implement you have on the farm. By means of a plow-lift, the engineer can conveniently throw the plows in or out as desired. The Bull Tractor will do any work that horses can do. It has been used to grade roads, switch box cars, run 32-inch separators, pump water for irrigation, pulling stumps, hauling logs, etc., etc.

Very Best Materials Throughout.

Every part is made of the material which engineering experience has found to be best suited for the purpose. In selling the Bull Tractor at \$395, we are allowed sufficient price to enable us to furnish the best quality of material as well as the best of workmanship. The machine would be termed a bargain at \$600, but we want to make its price sensational as well as its real utility. We want to make it an object for every farmer to buy one. No farmer can afford to be without one at \$395, fully equipped.

A Price Comparison.

You cannot purchase a single-cylinder similarly rated gas engine mounted on skids at the price for the Bull Tractor. Even though you could do so, you would need to have horses to drag it about the place, from plant to plant, back to the wood pile, then to the shelter; so that as a self-propelled stationary power, it is the best investment of the kind you can possibly make. We guarantee to deliver 12 horsepower on belt work. The "Bull" is also guaranteed to do the traction work of five good horses, and is The personnel of the men behind this machine is a guarantee in itself. These men pioneered power in the market for one, you should write to-day for further information and a copy of our order blank, which will be filled in with out next open delivery date.

Use Your Pencil.

Stop a minute, take your pencil and figure out what \$395 worth of "Bull Tractor" power will do, then figure how many horses you can buy for the same money. What's the answer? Bull Tractor, of course, which it would be called on to do frequently if you had one, wouldn't it? No harness, no feeding, no currying—no chores, just crank up and start the day's work.
